Infection control protocols – Covid-19 update

- a. Practice Manager will ensure that all clinical staff will have completed infection control training and certification.
- b. Practice Manager to ensure that the relevant training includes transmittable infectious diseases module.
- c. Attending clinical nurse/nursing assistant to be responsible for cleaning all surfaces in contact with the patient after each patient and specifically before each new patient arrives with Thoclор virucidal or similar strength product. Such cleaning will include door handles, external and internal and toilet faculties if used.
- d. A record of cleaning to be maintained by the lead receptionist and reported to the practice manager at the end of each clinic session.
- e. An appropriate, out of hours, clinic deep cleaning contract to be maintained during this period, organised and managed by the Practice Manager.
